EDUSS IPVOTE

IPVOTE is a new generation audience response system or “voting system”. It is a powerful combination of hardware and software that enables a teacher/presenter to get an unprecedented amount of feedback from students/participants. By using IPVOTE, the presenter can ask a planned question or a spontaneous one, and the audience can give their answers immediately. IPVOTE is particularly suitable for teachers wishing to facilitate testing, assessment and surveys for authentic assessment and instant student feedback in class teaching.

Features:
1. Results can be recorded, calculated and displayed immediately
2. Individual responses can be tracked or kept anonymous
3. Create questions in many forms
4. Wireless Connection
5. Easy to set-up, and use

Advantages:
1. Enhance audience attention and involvement
2. Confidential polling to bring out the reluctant questioners
3. Promotion of discussion and collaboration among students
4. Immediate feedback allowing for change of pace/level to suit the audience
5. Allows in-class testing, assessment and decision making
