EDUSS IPWAND for interactive whiteboards

IPWand is a new generation of interactive tool developed by JULONG.

It is designed to be used together with the IPBOARD. The most important feature of IP Wand is that it has the complete function as the normal electronic pen of IPBOARD, allowing users to write, draw, or control any functions of IPBOARD software.

This product, called the IP Wand works like a magical wand. Light, handy and easy, IP Wand allows an effective lecture delivery to the teachers. Write, draw and control any functions of IPBOARD software, you can easily control the IPBOARD without the need of standing closely to the board.

Technical Specifications Working electric current is less than 2MA. Turn off automatically after 45s non-operation. With 54.5cm length
