Hand Writing Recognition
Software Installation
Instructions and User Guide
Installing Handwrite

1. Run `handwrite.exe` on the PC you wish to install the software on
2. Follow the on-screen prompts, the serial number for the installation is `9o4a6r1d`
3. Once the installation is complete, click on Finish

Using Handwrite

1. Start Handwrite by clicking on Start > All Programs > Handwrite > FWRITE32
2. Click on the yellow button as shown below and click on the A button so that Handwrite recognises English characters
3. Next, you will need to change Handwrite to display English messages. To do this, first click on the Main Menu button
4. Then click on **Options**

![Options menu](image1.png)

5. Click on the 6\(^{th}\) tab

![6th tab](image2.png)
6. Click on the empty box next to **English Messages**

![Handwritten Recognizer Configuration](image)

6. Click on the empty box next to **English Messages**

7. This will change all of the messages to English

8. To begin character recognition, first open a Word Document or any other text editor

9. Then put the cursor where you want the writing to appear

10. Click on the **Mouse/Pen toggle** button

![Mouse/Pen toggle](image)

11. Begin writing. You will need to teach the program words, so that it will recognise them and put them into the document for you. To do this, first write the word you want to teach, then click on the **Learning** button

![Learning](image)
12. You will then need to type in the word you have drawn using the pen tool.

13. Once you have typed the word, you will need to click on **Apply**. Next time you write this word with the pen, it will be displayed in your document. You will need to repeat this process for all words you wish the software to recognise.
