

EDUTOUCH AUTOMATED INTERACTIVE TABLE

Now includes Snowflake MultiTeach 5

MULTI TEACH[®]

A VERSATILE SOLUTION THAT MAKES LEARNING FUN AND INTERACTIVE

EDUTOUCH AUTOMATED INTERACTIVE TABLE

The EduTouch interactive panel supports 20 Point Touch (55"-75") based on infrared technology, making it easy to perform touch and gesture based interactive activities. It can bring great flexibility to your kindy, classroom, lecture room, conference room or other business centre. The EduTouch Automated Interactive Table was designed to provide flexibility, allowing for use in a vertical position or in a horizontal position as an interactive table with smaller groups of users. The anti-glare, toughened glass screen ensures that the units can be used in virtually any area, as natural light through windows, florescent lights, etc. creates very little reflection on the screens. The built-in PC with integrated wireless connectivity and no external cabling provides a safe and versatile all-in-one solution.
