

EduTouch *Magic Carpet*

Interactive System

'Patent Pending – Application no. 61650032'

The EduTouch Magic Carpet, developed by Queensland University of Technology (QUT) researchers allows intuitive direct physical interactions with a digital environment without the need to master a mouse, keyboard or controller. This makes it an ideal system for young children, patients undergoing physical rehabilitation, people with disabilities and the elderly to name just a few. The technology allows the user to experience whole body immersive interaction and has many potentially educational, social and physical benefits.

EduTouch Magic Carpet Interactive System - Includes: Mobile Stand, Projector (3,100 Lumen), Built-in Core i5 PC, 3 x 2 meter White Durable Sheet with 20 Pre-Loaded Interactive Educational Games (12 Month Warranty).

Applications:

Early childhood care and education; Secondary education; Corporate training and team building; Pediatric therapy, assisting in the rehabilitation process; Health and fitness, encouraging physical activity; Advertising, immersing customers in an interactive environment and Disability services, providing previously inaccessible exploratory experiences.
